

## Project Development Phase Delivery of Sprint-1

TEAM ID	PNT2022TMID13823
PROJECT TITLE	INDUSTRY-SPECIFIC INTELLIGENT FIRE MANAGEMENT SYSTEM

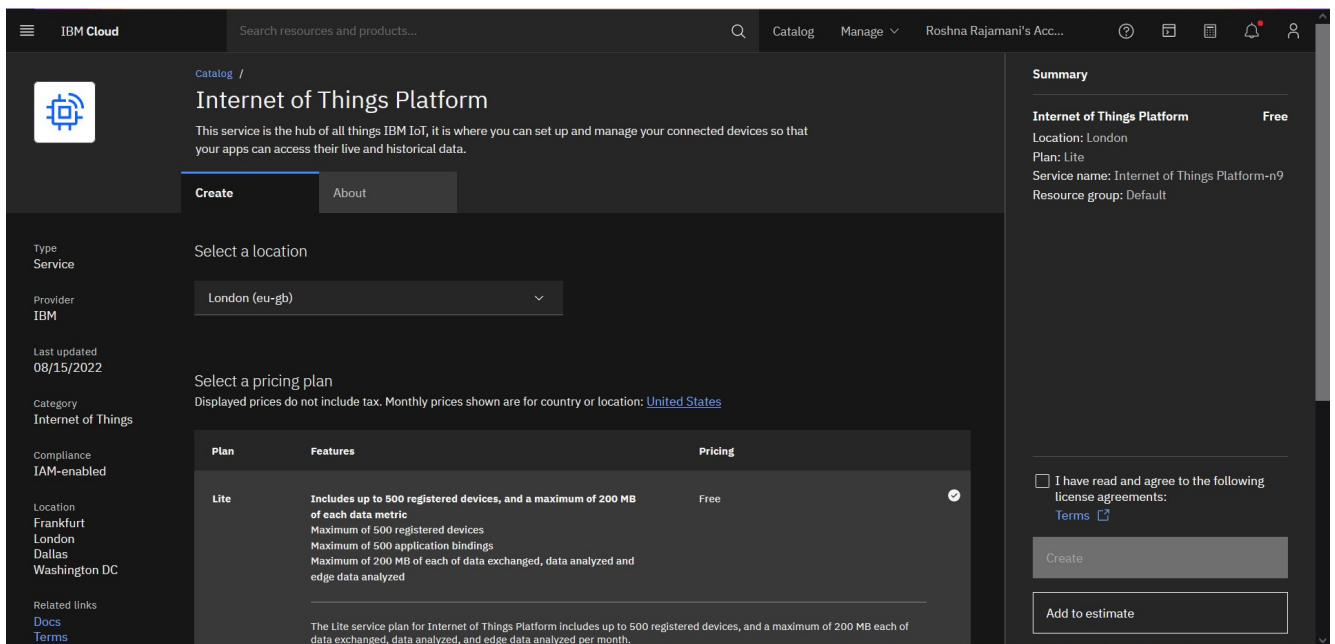

### BUILDING PHASE:

**TO Create the Watson Assistant Service and IOT Platform:**

The screenshot displays the IBM Cloud Dashboard interface. At the top, there's a navigation bar with the IBM Cloud logo, a search bar, and links for Catalog, Manage, and the user's account (Roshna Rajamani's Acc...). Below the navigation bar, the main content area is titled "Dashboard" and includes links to "Edit dashboard" and "Upgrade account". A prominent blue "Create resource" button is visible. The dashboard is organized into sections. The "For you" section features a horizontal carousel of recommended resources, including "Build", "Explore IBM Cloud Shell", "Visit the IBM Cloud catalog", "Build a web app with Watson Speech to Text", "Get Started with Watson Studio", and "Build a Virtual Private Cloud (VPC)". Each resource card provides a brief description, a "Getting started" button, and an estimated time to complete the task. Below the carousel, there are four columns of content: "News" (with links to SLSA Support, WebSphere Application Server Support, and IBM Adds Lifecycle Services), "Recent support cases", "Planned maintenance", and "IBM Cloud status" (which includes a world map visualization). A sidebar on the left contains various icons for navigating through the IBM Cloud ecosystem.

IBM Watson IoT Platform Journey

✓

Lite

The Lite service plan provides a lightweight development environment to get you started with the connectivity capabilities of Watson IoT Platform.

Free

Non-Production

The Non-Production service plan is a full-featured, fully-integrated offering that enables you to explore Watson IoT Platform to see how the service can fit into your IoT environment.

Starts at \$500 per month

Production

The Production service is a fully managed SaaS offering that enables you to manage and analyze enterprise IoT data.

Includes IBM Service & Support
