

Project Design Phase-I
Proposed Solution Template

Team ID	PNT2022TMID13823
Project Name	Project - Industry Specific Intelligent Fire Management System
Maximum Marks	2 Marks

Proposed Solution Template:

Project team shall fill the following information in proposed solution template.

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	To improve the safety management system in industries. Improving the safety management system against the fire incidents in industries.
2.	Idea / Solution description	To implement the fire safety management in industry based on IOT using Arduino board with fire detection and fire extinguisher system. And using some sensors (Humidity sensor, Flame sensor, smoke sensor) with GPS tracking system.
3.	Novelty / Uniqueness	An Integrated system of temperature monitoring, gas monitoring, fire detection automatically fire extinguisher with accuration of information about locations and response through SMS notification and call.
4.	Social Impact / Customer Satisfaction	It early prevents the accident cost by fire in industries. Nearby locations so maximum extend more accurate reliability. Compatability design integrated system.
5.	Business Model (Revenue Model)	This product can be utilized by industries .This can be thought of a great productive and helpful item as industries can rescuing people and machine from the fire accident.
6.	Scalability of the Solution	In this technique as we need to introduce an arduino gadget which was modified with an Arduino that takes received signals from sensor. It is Easy to operate and it requires low cost maintainance.
